WHY USE OXY ADVANTAGE?

- Better soil wetting and penetration (compared to using alkaline/caustic alone)
- Better soil removal (protein/mineral displacement)
- Less corrosion to the metal. Can be run hot (160° - 180° F) for optimum results
- Reduces amount of active alkalinity (caustic) required to achieve proper cleaning without harming the metal like a chlorinated caustic.
- Outperforms chlorine-based cleaners used in dairy CIP wash systems today.
- Will not degrade rubber components like chlorine-based products, will not corrode stainless steel like chlorine-based products.
- Reduces the need for hand scrubbing after cleaning.
