

FEATURES & BENEFITS

- Multilingual digital display in English and Spanish
- Splash resistant and durable ABS enclosure with DIN rail mounting bracket.
- Quick change pumps and fittings for easy squeeze tube replacement, no tools required
- Robust data management including chemical usage, cost, load counts, shift report
- Measures water displacement when each chemical is dispensed into the system. Accuracy is achieved by only measuring water with the flow meter and automatically adjusting dispensing time as the squeeze tubes wear for a precise dose

ORDERING INFORMATION

Aurora Premier

AIK01

NOTES

Comes pre-assembled. Just mount onto the wall, connect and set the program. No additional manual configuration is required.

Aurora Premier

A premium teat blending system.

The newest generation in Teat Dip dispensing technology that is blue tooth compatible. The built in platform locally stores programs, wash data, service notes, and reminders. The Aurora blends smart device capable technology with the best features of AgroChem's legacy dispensers such as quick-change pumps and durable pump gear motors.

System is compatible with all AgroChem teat dips including iodine and chlorine dioxide.
