

FOR HOOF HEALTH
SOLUTIONS
ONE NAME
STANDS ALONE:
HEALMAX[®]

LEADING THE HERD
IN HOOF CARE.

AgroChem

**FAST RESULTS
WITHOUT FORMALDEHYDE.**

AgroChem, Inc. offers a program designed to minimize or eliminate hoof problems in dairy cows caused by their interaction with the environment.

One of our flagship products, HEALMAX[®] provides proven solutions to these challenges.

HEALMAX®:

AN ADVANCED SOLUTION TO REPLACE FORMALDEHYDE

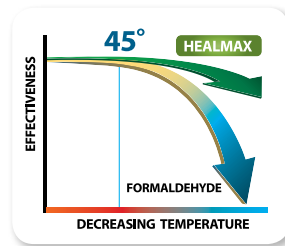

HEALMAX® Footbath Concentrate

A revolutionary footbath additive that provides quick results without formaldehyde.

HEALMAX® Footbath Concentrate is a biodegradable footbath additive that is easy to mix and use.

- Fast-acting formula gives you results in just a week or less.
- Maintains control of digital dermatitis better than any other non-formaldehyde product.
- Broad-spectrum activity maintains effectiveness even in the presence of organic matter.
- Preserves elasticity and hardness of the hoof. Formaldehyde can make hooves brittle and cracked.
- Effective in both hot and cold weather when formaldehyde loses efficacy.

Effective even in Cold weather

Item Numbers: 6405-5 gal, 6406-15 gal, 6407-55 gal, 6408-265 gal

HEALMAX® Cu+ Footbath Concentrate

Provides the benefits of HEALMAX® with a touch of copper.

HEALMAX® Cu+ is an all-in-one concentrate that quickly delivers the results you need. The solution combines HEALMAX® with just the right amount of copper sulfate for added reliability when controlling hoof rot.

Item Numbers: 6463-55 gal and 6464-265 gal

The HEALMAX® family of products features an exclusive, PATENTED FORMULA that replaces formaldehyde for the control of digital dermatitis. HEALMAX® is safer for cows and crew, more effective in cold weather, and is better for the environment than formaldehyde. That is why HEALMAX® is THE product for digital dermatitis.

"When we ran HEALMAX®, warts started going away. We went from 10% of our herd with warts to basically none, and average milk production went up about 2 pounds. We have used copper sulfate and other products, but have never seen the results we have with HEALMAX®. We are definitely getting bang for our buck."

"BANG FOR OUR BUCK"

Brent Malena, Owner of Holsteins Unlimited LLC, Leigh, NE (1,550 cows)

HEALMAX® Spray

A fast-acting topical antiseptic that clings to the problem area.

HEALMAX® Spray is designed for easy spot application without formaldehyde.

- Special gel formulation adheres to the area that needs treatment.
- See results with just one or two applications, on the same day or consecutive days.
- Provides exceptional results without dangerous formaldehyde.
- When using a footbath, HEALMAX® Spray can also be used for severe cases that require extra attention.

Item Numbers: 6602-1 qt and 6603-1gal

HEALMAX® Foam

An economical, easy-to-use application method for the entire herd.

HEALMAX® Foam is ideal for whole-herd application of milking cows, dry cows and heifers, or anytime the footbath can't be used.

- Use in the parlor for milking cows to provide visible coverage and additional contact time where it is needed most.
- For dry cows and heifers, can be applied during feeding with animals in headlocks.

Item Numbers: 6005-3 gal, 6002-5 gal, 6003-15 gal, 6004-55 gal and 6010-3 box

HEALMAX® Paste **NEW!**

HEALMAX® Paste is a fast-acting formulation containing HEALMAX® in a unique paste that simplifies handling and ensures contact with the infected area.

- See results with only a one-time application.
- Non-antibiotic product does not create issues in withholding of milk.
- Not painful like copper and much safer than formaldehyde.

Item Numbers: 6611- and 6612- boxes

"We were having problems in winter with hoof baths freezing and products not working well at cold temperatures. Since switching to HEALMAX®, we've got our hairy heel wart problem well under control without dangerous formaldehyde fumes. The hoof trimmer says he can tell it's working!"

"A GREAT HOOF PRODUCT"

Mike Berwald, Owner of Berwald Toronto Dairy, Toronto, SD (550 cows)

See fast results with HEALMAX®

After

"I've seen dairymen save thousands of dollars using HEALMAX®. Used correctly, it delivers positive results in one week. HEALMAX® is an important management tool for the dairy and will pay for itself many times over. I would recommend HEALMAX® to anyone whether or not they have a hairy heel wart issue. It's much safer and easier to use than copper sulfate, is non-corrosive, and will not harm your land."

**"VETERINARIANS"
CHOICE**

Dr. Mark Whelan, DVM and Hoof Trimmer, Mondovi, WI

What veterinarians and dairy producers are saying about HEALMAX®

"We can't afford to lose production because of foot problems. With HEALMAX®, we don't have to. Unlike similar footbath additives, HEALMAX® gets right to work and does what it's meant to do. It stains the hooves so we know we're getting good coverage. We now have fewer overall foot problems throughout the herd, and the animals are walking better, eating better and milking better. HEALMAX® is easier to use than copper sulfate and much safer for our employees. It really works!"

- Chad Martin, Owner,
Martin Dairy LLC – Tillamook, OR (1600 cows)
Largest-producing Jersey herd in the US

"An essential part of controlling hairy heel warts on our farm."

- Kyle Vanderhyde, Owner Vanderhyde Dairy LLC
Chatham, VA (250 cows)

"We started spraying HEALMAX® twice a week, and noticed a lot fewer warts after just two days. Not only did the warts dry up, but we also saw improvements in milk quality, a reduction in SCC and an increase in feed consumption."

- Jacob Moes, Owner of MoDak Dairy
Goodwin, SD (2,200 cows)

"We would definitely recommend HEALMAX® to other producers."

- Rick Hartmen, Herdsman at Ricker Brothers LLC
Eldorado, WI (900 cows)

Progressive dairy producers all over the world rely on AgroChem for advanced chemical solutions for hoof care. To learn more about HEALMAX® and AgroChem's full line of hoof care products, call us or visit www.agrocheminc.com.
