

EXTENDED TIME

- **The new XT line of teat dips is designed to outlast standard chlorine dioxide-based dips after mixing.**
- **Each product is a two-part chlorine dioxide system designed to effectively treat and prevent mastitis, and minimize hyperkeratosis.**
- **Once activated, powerful germicides are produced which kill a broad spectrum of bacteria within 15-20 seconds.**
- **Each XT formulation is designed to meet the unique challenges of different operations.**

EXTended protection & skin conditioning

XT BARRIER- Long-lasting barrier protection

- Forms a physical barrier on teat skin to physically block pathogens
- Dual-germicide system provides quick kill and long-lasting protection
- Barrier film is easily removed with standard pre-dips
- Rich skin conditioning and emollient system

XT PRE-POST- Protection and skin conditioning in one versatile product

- Dual germicide plus lactic acid to promote teat exfoliation
- Rich skin conditioning and three part emollient system with special ingredients to rejuvenate teat skin
- Lactic acid provides gentle exfoliation of dead skin and removes keratin build-up without harming healthy tissue
- Can be used as a spray, dip or foam
- One product for pre and post dipping

XT-ULTRA- Economical, concentrated pre-dip

- Highly concentrated formula provides a very cost effective pre-dip solution
- Can be used as a spray, dip or foam
- Contains 2-way emollient system including lanolin and glycerin
- Solution remains active, with high levels of CL02, for up to 5 days

XT-22C - Economical alternative to iodine, post-dip

- Premium emollient system that contains Lanolin, Glycerin, and Propylene Glycol for ideal post-milking skin conditioning.
- Solution remains active, with high levels of Chlorine Dioxide, for up to 5 days.
- Highly concentrated formula provides a cost effective post-dip solution.
- Can be used as a spray, dip or foam.
