

## EXTENDED TIME

- The new XT line of teat dips is designed to outlast standard chlorine dioxide-based dips after mixing.
- Each product is a two-part chlorine dioxide system designed to effectively treat and prevent mastitis, and minimize hyperkeratosis. Once activated, powerful germicides are produced which kill a broad spectrum of bacteria within 15-20 seconds.
- Each XT formulation is designed to meet the unique challenges of different operations.

## Economical, highly concentrated pre-dip.

**XT-ULTRA is designed to thoroughly clean teats and quickly kill bacteria before milking, with an emollient package for skin conditioning.**

- **Part I:** Acidified Sodium Chlorite (ASC) quickly kills a broad spectrum of contagious and environmental pathogens known to cause mastitis, including *Mycoplasma bovis* and *Pseudomonas aeruginosa*, as well as molds, yeasts and viruses.
- **Part II:** A long-lasting secondary germicide picks up where ASC leaves off to keep killing harmful pathogens and prevent infection.
- Highly concentrated formula provides a very cost effective pre-dip solution
- Can be used as a spray, dip or foam
- Contains 2-way emollient system including lanolin and glycerin
- Solution remains active, with high levels of  $ClO_2$ , for up to 5 days
- Mix ratio is 1 : 1 : 18-1 Part A, 1 Part B; Can be diluted up to 1 : 1 : 64 depending on desired strength.

### XT-ULTRA Concentrate Part A

3791A	5 gal
3792A	15 gal
3793A	55 gal
3794A	265 gal

### XT-ULTRA Concentrate Part B

3971B	5 gal
3972B	15 gal
3973B	55 gal
3974B	265 gal
