

# Footbath DOSING SYSTEM

## AUTOMATED FOOTBATH DOSING SYSTEM

### Improve accuracy and dramatically reduce costs

The **AgroChem Footbath Dosing System** simplifies your footbath procedure by delivering an accurate, pre-mixed solution at the push of a button. With less room for human error, your operations will benefit from greater accuracy, cost and labor savings, and consistent, repeatable results.

- **Auto program** – no more manual measuring or mixing of chemicals.
- **Replenish system accurately fills bath** with the correct amount of water and footbath concentrate to achieve best results.
- **Saves money** by reducing labor through automation, maintaining proper footbath chemistry and only adding footbath solution when needed.
- **Uses two different pumps**, so you can run chemicals separately or in rotation; can run up to 8 footbaths at once.
- **Safe** – reduces employee interaction with chemicals.

For use with:

DURAHOOF

Ultra  
2n1

### CONSISTENT FOOTBATH SOLUTION

Automatically fills the footbath with the correct proportion of water and chemicals

Can operate up to 8 footbaths running one or two products in rotation
