Section 5. Fire-Fighting Measures

Suitable extinguishing media	Use extinguishing measures that are appropriate to local circumstances and the surrounding environment. Including water and water spray.
Unsuitable extinguishing media	None known
Specific hazards during fire fighting	Oxidizing material. May intensify fire. In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous combustion products	Oxygen
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.
Specific extinguishing methods	Use water spray to cool unopened containers. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. In the event of fire and/or explosion do not breathe fumes.

Section 6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures	: Ensure adequate ventilation. Keep people away from and upwind of spill/leak. Avoid inhalation, ingestion and contact with skin and eyes. When workers are facing concentrations above the exposure limit they must use appropriate certified respirators. Ensure clean-up is conducted by trained personnel only. Refer to protective measures listed in sections 7 and 8.
Environmental precautions	Do not allow contact with soil, surface or ground water.
Methods and materials for containment and cleaning up	Eliminate all ignition sources if safe to do so. Stop leak if safe to do so. Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Flush away traces with water. For large spills, dike spilled material or otherwise contain material to ensure runoff does not reach a waterway.

Advice on safe handling	Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Do not ingest. Keep away from fire, sparks and heated surfaces. Do not breathe dust/ fume/ gas/ mist/ vapors/ spray. Do not get in eyes, on skin, or on clothing. Wash hands thoroughly after handling. Use only with adequate ventilation. Warning! Do not use together with other products. May release dangerous gases (chlorine).
Conditions for safe storage	Keep away from heat and sources of ignition. Keep in a cool, well ventilated place. Keep away from oxidizing agents. Keep away from reducing agents. Keep away from strong bases. Keep away from combustible material. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers. Store only in original container.

Toxicity to daphnia and other aquatic invertebrates	:	Peroxyacetic acid 48 h EC50: 0.73 mg/l
Toxic to algae	:	Peroxyacetic acid 72 h EC50: 0.7 mg/l Hydrogen peroxide 72 h EC50: 1.38 mg/l The fate of peracetic in water will be influenced by abiotic degradation, which yields acetic acid and oxygen, and hydrolysis, which forms acetic acid and hydrogen peroxide, both of which are easily biodegradable compounds.
Persistence and degradability	:	Based on its low octanol-water partition coefficient and its rapid degradation in the environment, this product is not bioaccumuable.
Bioaccumulative potential	:	Peracetic acid released in the environment will partition almost exclusively (>99%) to the water compartment. The fate of peracetic acid in the environment is mainly determined by its degradation.
Mobility in soil	:	
Other adverse effects	:	No data available -Toxic to aquatic organisms -Hazard for the environment is limited due to product properties:
Remarks	:	considerable abiotic and biotic degradability, weak persistence of degradation products. -Does not bio accumulate
