

Advanced Chemical Solutions for Automated Milking Systems

AMS BRUSHWASH

- Foaming Brush Cleaner has foaming action that serves as a visual indicator for cleaning action.
- Powerful peracetic acid sanitizer designed to prevent cross-contamination when the robotic system meets the skin.

- The new XT line of teat dips is designed to outlast standard chlorine dioxide based dips after mixing.
- Each product is a two-part chlorine dioxide system designed to effectively treat and prevent mastitis, and minimize hyperkeratosis.
- Once activated, powerful germicides are produced which kill a broad spectrum of bacteria within 15 -20 seconds.
- Each XT formulation is designed to meet the unique challenges of different operations.

- Fast-acting, excellent skin conditioning
- Synergistic effect between lactic acid and glycerol monolaurate, both food-grade antimicrobials, provides a very broad-spectrum kill.
- Every component in Aura contributes toward improved skin condition. Lactic acid hydrates and nourishes skin while penetrating and gently exfoliating dead cells, allowing for regrowth of fresh skin.
- Three-part emollient system, including lanolin, provides hydration and reinforces natural lipid barrier.

Advanced Chemical Solutions for Automated Milking Systems

Alkaline CIP Detergent

- The leading CIP detergent for producers who need confidence their robotic equipment is thoroughly and efficiently cleaned.
- Phosphate-free, non-foaming formula with Poly-TEC polymer technology for superior emulsification.
- Special rinse additives promote rapid and clean sheeting of water off surfaces while chelating agents bind metallic salts for efficient cleaning in variable water conditions.

StrongHold

StrongHold CitraPhos Acid Rinse
without Sulfuric Acid

- Light-duty acid rinse formulated to demineralize equipment without affecting optical sensors.
- May help protect against corrosion.

OXYSAN

- Effective against a broad spectrum of microorganisms.
- No-rinse, non-foaming formula is EPA registered.
- Highly effective, economical and environmentally acceptable.
